[github/saminwankwo](https://github.com/saminwankwo) | [linkedin/in/saminwankwo](https://www.linkedin.com/in/saminwankwo)

PROFESSIONAL SUMMARY

Results-driven Backend Engineer with 5+ years in **Node.js** (incl. NestJS) and 7+ years in **PHP/Laravel**. Expert at designing and deploying scalable microservices and secure APIs on AWS and Docker. Proven track record of reducing response times by 30%+, integrating payment and mailing solutions, and mentoring teams.

TECHNICAL SKILLS

- **Languages & Frameworks:** Node.js (NestJS, Express.js), PHP (Laravel), JavaScript, TypeScript
- **Databases:** MongoDB, MySQL, PostgreSQL
- **API Development:** REST, GraphQL
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Docker, Nginx, GitHub Actions (CI/CD)
- **Testing & Security:** Jest, PHPUnit, OWASP best practices
- **Frontend (basic):** React.js
- **Other Tools:** Redis, RabbitMQ, WebSockets, Git

PROFESSIONAL EXPERIENCE

Sweetfly – Backend Engineer (Full-Time)

Cumbernauld, Scotland (Remote) | May 2024 – August 2025

Tech: NestJS, Express.js, MongoDB, AWS (EC2, ELB, S3), Docker

- Developed and maintained a production e-commerce API (v1 in Express.js, v2 migrated to NestJS), supporting a chat-style ordering flow and complex order orchestration.
- Integrated delivery partners (Stuart, Shipday, Gophr) and payment methods (Stripe, Apple Pay); implemented split payments and reconciliation using webhooks.
- Deployed services to AWS EC2 behind load balancers, configured autoscaling and

health checks; used S3 for uploads and backups to ensure high availability.

- Built a WhatsApp notification bot to send order and delivery updates, reducing support tickets and improving customer engagement.

Olotu Square – Backend Engineer (Contract)

Port Harcourt, Nigeria (Remote) | May 2024 – Present

Tech: Node.js, Express, Laravel, MongoDB, MySQL, Docker, GitHub Actions

- Migrated a legacy PHP application to Laravel, improving maintainability and reducing technical debt through standardized architecture and automated tests.
- Built a multi-tenant Laravel platform with tenant isolation and automated provisioning to streamline client onboarding.
- Developing backend APIs for client applications using Node.js/Express, MongoDB, and MySQL, focusing on authentication, performance, and robust error handling.
- Implemented CI/CD pipelines with GitHub Actions and Docker, enabling zero-downtime deployments and repeatable releases.
- Led a 4-month hands-on backend training program (Node.js, Express, API design, testing) at the company's tech training centre and mentored developers in integrating Next.js frontends with backend APIs.
- Collaborated with product and QA teams to deliver multiple major features within tight timelines, improving time-to-market.

Webxiel – Laravel Developer (Contract)

Enugu State, Nigeria (Remote) | Jan 2024 – Oct 2024

Tech: PHP, Laravel, MySQL

- Contributed to a single client engagement at this consulting firm, developing a Laravel microservice as part of a microservices architecture for a landlord-to-tenant mobile API.
- Implemented secure RESTful endpoints, authentication flows, and webhook integrations to support mobile workflows and push notifications.
- Optimized service endpoints and database interactions to improve response times and

reliability in production.

- Collaborated closely with mobile developers, backend teammates, and UX designers to ensure API contracts matched frontend expectations and delivery timelines.

iGiet Ltd – Software Engineer (Contract)

Port Harcourt, Nigeria (Remote) | Nov 2023 – Sep 2024

Tech: Node.js, Express.js, Laravel, React.js, WordPress

- Contributed to multiple client engagements, delivering backend and frontend solutions across projects.
- Debugged and maintained two WordPress applications, resolving critical issues and improving stability for client deployments.
- Built and integrated frontend features in React.js and backend services in Node.js/Express for a vehicle registration mobile app, implementing authentication, form validation, and API contracts.
- Designed and developed the Parrot mobile app backend (Node.js/Express), creating RESTful endpoints, authentication, and real-time update hooks.
- Delivered e-commerce modules (product catalog, cart, checkout, order history) and established a REST+GraphQL hybrid API to optimize data fetching and reduce client load by ~30%.
- Improved frontend performance through server-side rendering and asset optimizations, reducing load times by ~50% in targeted applications.

Credib – Backend Developer (Full-Time, Remote)

Port Harcourt, Nigeria (Remote) | Aug 2022 – Feb 2024

Tech: Node.js, Express.js, GraphQL, MySQL, AWS (EC2, S3), Docker, Redis, RabbitMQ

- Designed and implemented a GraphQL API & gateway in Node.js/Express to unify data access across product microservices for an e-commerce platform with chat-style ordering.
- Built order and payment workflows, implementing split payments with Paystack, and

integrated S3 for media uploads and storage.

- Implemented caching (Redis) and background processing (RabbitMQ) to improve throughput and reduce latency under load.
- Developed transactional services backed by MySQL, managed deployments on AWS EC2 with Docker.
- Collaborated with product, mobile, and payments teams to ensure seamless checkout experiences, payment reconciliation, and production stability.

Emblc Technologies – Software Developer (On-site)

Port Harcourt, Nigeria | Mar 2020 – Jul 2022

Tech: PHP (vanilla), MySQL, Java (Android/Kotlin), HTML/CSS/Bootstrap, AWS

- Worked on-site at a consulting firm and training institute, building multiple enterprise web applications using vanilla PHP, MySQL, and Bootstrap.
- Built OfficePro, an all-in-one office management system (HR, Payroll, Inventory, Invoicing, Time & Attendance, Requests, Reports) that digitized administrative workflows.
- Developed a Hospital Management System (patient management, appointments, pharmacy, diagnostics, bed allotment, billing) with online appointment booking and operational reporting.
- Implemented backend APIs in vanilla PHP to power mobile apps (Android — Java/Kotlin) and published mobile builds (including MyReminda) to Google Play Store.
- Delivered MyReminda, an automated document & certificate reminder service with SMS/email notifications and large storage capacity.
- Built a Point-of-Sale solution used by supermarkets and converted a legacy payroll product (Pay Record Pro) with tax calculations, banking interface, payslip dispatch, and Excel/PDF reporting.
- Started development of a Learning Management System (LMS) and completed core modules before handover; maintained nightly backups and AWS-based monitoring.

Softicu – Frontend Developer

Umuahia, Abia State, Nigeria (On-site) | Jun 2019 – Dec 2019 |

Tech: HTML5, CSS, Bootstrap, React.js, JavaScript

- Built responsive and accessible UI components using HTML5, CSS (Bootstrap), and React.js for client projects.
- Translated UI/UX designs into production-ready frontends, improving page load performance and cross-browser compatibility.
- Collaborated with backend developers to integrate APIs and ensure seamless data flows in single-page applications.

OTHER EXPERIENCES

Textbooks.ng – Software Developer - Aba, Abia, Nigeria | Mar 2016 – Oct 2018

Tech: PHP, MySQL, HTML/CSS

- Built an e-commerce platform for selling books using PHP and MySQL, implementing product catalog, cart, checkout, and inventory management.
- Implemented payment integrations and optimized database queries to improve transaction reliability and throughput.

AspireLabs – Frontend Developer - Aba, Abia, Nigeria | Mar 2018 – Oct 2018

Tech: HTML, CSS, Bootstrap, JavaScript, React.js

- Built responsive, accessible user interfaces and reusable components using HTML, CSS (Bootstrap) and React.js.
- Collaborated with designers to translate UI/UX designs into production-ready frontends and improved page load performance.

Gilmor Engineering Nigeria Ltd – Data Entry Clerk

Oferepke Water Treatment Plant, Nigeria | Mar 2011 – Nov 2012

Tech/Tools: Microsoft Excel (advanced), Google Sheets

- Managed and validated large site data sets using Microsoft Excel, creating templates and pivot reports to improve data accuracy and reporting speed.
- Implemented data-cleaning routines and standardized input formats, reducing entry errors and reconciliation time.
- Produced weekly summary reports for engineering teams enabling faster decision-making and resource allocation.

FREELANCE PROJECTS (Remote | 2017– Present)

Worked with global clients across fintech, healthtech, e-commerce, and education — delivering end-to-end backend solutions, integrations, and developer tooling.

Selected freelance engagements:

- DigiBank (NG) — API integration & loan scheduling system (PHP / Laravel).
- VendoHub (US) — Vendor onboarding & marketplace services (Node.js, MongoDB).
- EduCrest LMS (UK) — Learning management backend with role-based access (NestJS).
- Schetia (NG) — Learning management platform (Node.js, Express, MongoDB).
- Movment (NG) — Ride-sharing backend and dispatch API (Node.js, Express).
- GodgraceLab (NG) — Healthcare admin portal with reporting & analytics (PHP, MySQL).
- KID (NG) — Children's learning platform (React.js, Node.js).
- SparkxyFix (NG) — Maintenance services app (Node.js, payments, booking).
- AI Intrusion Detection System — AI-enhanced network security monitor (PHP, TensorFlow).

VOLUNTEER & COMMUNITY

Siliconverse – Frontend Developer (Volunteer) | Oct 2024 – Dec 2024

- Built responsive UI components and collaborated with designers on early-stage products.

CodeSpark Nigeria – Coding Instructor | Oct 2018 – Dec 2019

- Taught programming basics to 300+ students during Africa Code Week.

PROJECT HIGHLIGHTS

- **Auth SDK for Express.js (JavaScript, TypeScript)**
Published and maintained an Express.js authentication SDK on npm, simplifying token-based auth integration; adopted by 200+ applications via npmjs.com.
- **Remote Access Terminal (RAT) (Node.js, WebSockets)**
Built a secure remote access terminal tool enabling authenticated shell management over WebSockets; reduced support troubleshooting time by 60% during support sessions.
- **AI Intrusion Detection System (PHP, TensorFlow)**
Developed an AI-driven network intrusion detection prototype using PHP for data ingestion and TensorFlow models for anomaly detection; achieved 92% detection accuracy and real-time alerting.
- **DevXP.dev (Node.js, Express, MongoDB, AWS)**
Launched a developer upskilling platform simulating real-world Git workflows, code reviews, and TDD exercises; onboarded 500+ users in 3 months with an 80% weekly active rate.
- **Sports Prediction API (Node.js, ML integration, AWS Lambda)**
Developed serverless API wrapping a pre-trained ML model; delivered real-time win-probabilities with <100 ms cold start and 99.7% uptime.
- **Multitenant SaaS Platform (Laravel, MySQL, Docker)**
Architected tenant-isolated databases for 50+ clients; automated provisioning to reduce setup time from 3 days to 30 minutes.
- **E-Commerce API (Laravel, MySQL, Stripe)**
Engineered RESTful endpoints for product, cart, and payment flows; processed \$1M+ in first 6 months with zero downtime.

- **Interactive Developer Portfolio (React, Node.js, GitHub Actions)**

Created a dynamic portfolio site fetching live GitHub data; achieved SSR with 95+ Lighthouse performance scores.

- **Computer Based Test(CBT)(PHP, MYSQL)**

Built and deployed a fully functional CBT Based application for Abia state polytechnic.

EDUCATION

B.Sc. Computer Science

Michael Okpara University of Agriculture, Umudike | 2015 – 2019
